

Haunted house

Mr. Gregory has been my neighbour for some time, the house he moved into is very large, Gregory stated that he himself was not quite familiar with his new property. However, for several weeks he has been complaining about disappearing objects, strange sounds and recently claimed that he saw someone! he is a type of paranoid so he quickly began to tell people that his house was haunted. So I decided to check it out and one day I came to him to find out if there were actually paranormal events in his house. The ghost was supposed to be a rather beautiful woman. Gregory offered me coffee and together we waited patiently for an event, but despite the passage of time nothing happened. I asked him to take me to the room where he saw the woman, and I started looking around. There was nothing extraordinary in the room, but one of the walls looked unusual, definitely differed in color from the rest, I decided to take a look at it. I walked up to the wall and leaned slightly against it and it suddenly opened! It turned out that the property is connecting to another house, and its resident accidentally discovered it. After discovering the passage, she had no idea that the house was inhabited by someone and occasionally visited Gregory's greenhouse unintentionally scaring him. After that Gregory and the woman began to hang out and got rid of the passage by connecting their possessions.
